

**Integra Firestoppers LLP**, an organisation based out of UAE and having offices in India at Mumbai and Delhi.

We offer a comprehensive range of high quality, Third party-tested products and services.

## OUR RANGE OF PRODUCTS AND SERVICES INCLUDES:-

- Fire, Smoke, Intumescent Seals (Fire Seals)
- Acoustic Seals (perimeter Seals) Self Adhesive and Groove Profiles
- Protection Glazing Kits and Ironmongery Kit
- FR Foams (B1, B2, B3) Grades
- FR Acrylic Sealant (Fire & Acoustic Sealant)
- G2G (Glass to Glass Joints)
- Passive Fire Solution / Firestop Systems (Mep Penetrations / Curtain Wall Joints / Construction Joints)
- Fire Proofing System of Steel Structure / Wooden Structure.
- Fire Retardant / Fire Proof Coating
- Fire Retardant Cable Coatings
- Water Proofing Solutions

## Fire Door Solutions

Our products are based on the chemistry of expandable graphite. It is flexible and thus easy to install and comes with self-adhesive backing. Our intumescent fire strip is designed to expand to many times its installation size to prevent air circulation and the escape of hot gases and smoke between doors, frames and other potential gaps where fire resistance is required.

### Intumescent with PVC casing

High performance fire seal incorporating a purpose-designed upvc sleeve. It also features a brush pile smoke seal and is primarily intended for installation in wooden fire doors of flush, panelled and glazed construction.

### Flexible Intumescent

Our unique, flexible, intumescent is now available to the market. It is the only fully-tested, flexible intumescent suitable for use as a fire-rated, perimeter seal in uPVC framing systems. These products come on a coil and are easy to fit and easy to trim. Your workforce only use what they need so: **NO WASTE!**

### Ironmongery

Where fire resistance is concerned, concealed door closer mechanisms are an obvious weak point in any timber door and in the event of a fire, they can have a seriously detrimental effect on the integrity of both door and frame. By fitting intumescent kits, this problem can be simply overcome, providing a high performance intumescent gasket that will insulate the timber, slow the charring process and enhance the fire resistance to a more acceptable level.

### Glazing

Self-adhesive, pvc encapsulated strips of intumescent that provide proven fire protection for glazed doors, screens and partitions. In the event of fire, the intumescent swells to form a seal within the glazing pocket and also reduces the risk of premature ignition of the glazing beads on the protected face. The system is easily installed and suitable for any shape of aperture as well as larger glazed panels.

## Fire Retardant Acoustic Foam & Sealants

Fire Retardant Acoustic Foam is an open-cell polyurethane-based material impregnated with inorganic minerals produced for acoustic, thermal, water and dust insulation. Shows high performance in fire resistance tests. Excellent for sealing difficult to reach areas that need sealing. It can be used for door frame fixing and is available in both fire rated and non-fire rated type. Fire Retardant Acrylic Sealant, are acrylic based sealant, paintable, best use for linear joints with acoustic rating.

## Fire Stopping Solutions

We specialise in distributing evidence-based high-performance fire protection products and systems that you can trust to perform well. We provide complete supply-apply support to our clients with our trained and certified fire stop application team. We Supplied products are fully certified and system tested.

## Fire Proofing & Fire Retardant Cable Coating Services

We bring latest products from world wide in the field of fire proofing, fire retarding, fire stopping or compartmentalizing the fire and fire suppression. All products & solutions are certified or tested by international agencies.

All Passive fire protection Products & Systems under UL - EU Approved.
